Canadian Concrete Pipe & Precast Association

Build on our strength

The Canadian Concrete Pipe and Precast Association was incorporated in November 2013.

Mission Statement:
The Canadian Concrete Pipe and Precast Association delivers leadership on policy and education, to ensure appropriate standards and specifications for resilient underground civil infrastructure.

Vision Statement:
To ensure resilient underground civil infrastructure, the choice for every owner and specifier is concrete pipe and precast products.

The Concrete Pipe Journal

The Concrete Pipe Journal is the flagship publication of the Canadian Concrete Pipe and Precast Association and distributed three times a year. Each issue contains articles and photographs chronicling industry updates, trends, and key issues pertinent to anyone in the infrastructure industry. Not on our mailing list? Request your free subscription to the Concrete Pipe Journal by emailing resources@ccppa.ca or calling 519.489.4488.

Plant Tours

Let CCPPA organize a plant tour for your team. Member facilities produce a wide range of concrete pipe and precast products.

Our tours address:

- Quality Control
- Plant Prequalification Program
- Dry cast manufacturing
- Wet cast manufacturing
- Three edge bearing strength testing
- Hydrostatic testing
- Product examination. Call 519.489.4488 or email resources@ccppa.ca to book your tour today.

Lunch & Learn

Educate your staff on topics such as Protecting Yourself as a Gravity Pipe Designer, the Marston Spangler Method or PipePac Software with a free Lunch & Learn from CCPPA. You select the topic and invite key members of your team, and we bring lunch and a 60-minute presentation — at no charge to you.

To schedule a date for a Lunch & Learn presentation at your office, contact the CCPPA at 519.489.4488 or email resources@ccppa.ca.

Canadian Concrete Pipe and Precast Association 447 Frederick St, Suite 200, Kitchener, Ontario N2H 2P4

Build on our strength

Seminars

CCPPA engineers prepare seminars that are both informative and educational for designers, project managers and inspectors of gravity storm and sanitary sewer projects. Association staff takes the time to meet with groups in regional centres across Canada to present the seminars and discuss the content.

Seminars are focused on how pipe systems should be assessed from technical, financial and risk perspectives. The presentations include recommendations on how engineers can protect themselves by addressing engineering, installation and quality control issues in gravity pipe specifications. Attendees can earn professional development hours (PDHs).

Learn from industry professionals on how to specify both rigid and flexible underground pipe systems.

Who should attend:

· Design Engineers/Technologists

· Project Managers

· Contract Administrators

· Construction Inspectors

Free Technical Resources

At ccppa.ca valuable technical resources are available at no charge. Simply click and download. Resources available include:

PipePac Software: This user-friendly software allows designers to determine the class of concrete pipe available for any installation conditions that may be anticipated. Visit pipepac.com to use this tool for your project.

Concrete Pipe Information Booklet: The answers to many of your concrete pipe questions can be found in the *Concrete Pipe Information Booklet*, which includes sections on manufacturing, design, and installation.

Design Manual: Contact us to have a CD ROM of the *Concrete Pipe Design Manual* mailed to you or log on to to ccppa.ca download. To request your CD, simply email resources@ccppa.ca. Include your full name and mailing address.

Concrete Pipe Installation Guide: This booklet is a simple guide that shares information on various aspects of concrete pipe installation. It keeps you on top of information such as the Ontario Provincial Standards, Ontario Building Codes, site preparations, product inspection and more.
